-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-6 and 8-14 rejected under 35 U.S.C. 103(a) as being unpatentable over the Japanese patent 2002/50090 A in view of Yamaguchi (US 6 405 122). The Japanese patent discloses a calculation for an air charge by detecting an airflow rate and an airflow pressure in an internal combustion engine (the applicant's specification page 1). However, the Japanese patent does not show the use of a pressure sensor to correct the estimated pressure in the intake air passageway. Yamaguchi shows that the provision of a pressure sensor to correct the estimated pressure in order to correct the air charge in the internal combustion engine is old and well known in the art (Fig. 4, Col.14, lins 55-68). Since the prior art references art from the same field of endeavor, the purpose disclosed by Yamaguchi would have been recognized in the pertinent art of the Japanese patent. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of the Japanese patent with the pressure sensor as taught by Yamaguchi in order to correct the estimated pressure.
